

GREEN HOCKEY

A game changing new hockey movement to grow the game.

GREEN.HOCKEY

COMPANY

OVERVIEW

Green Hockey is a **Swiss-based** sports **technology** startup with focus on performance and sustainability.

- **Swiss Made**, game-changing solutions to grow the game globally.
- **Multi billion dollar market** for off-ice and training products, pushing the total addressable hockey market (the new market is not limited to active players).
- **Patented products** and ideas to revolutionize the existing hockey market.
- The team includes **experienced technology-driven individuals & experienced Pro Hockey Players** that are creating **energy-efficient facilities** to create a future experience.
- We have successfully entered the NHL with our **Black Ghost carbon blade** worn by Nino Niederreiter since 2021 (proof of market).

Green Hockey's pro Market Launch: NHL-Licensed Performance Equipment

Nino Niederreiter; Pius Suter & Ryan O'Reilly
official Green Hockey - Black Ghost carbon blade

We're creating a future where hockey is sustainable, accessible year-round, and inclusive for all.

Our innovation eliminates seasonal constraints, helping to **democratize our sport** and lower the cost of ice time.

Mission 26 is our commitment to make our synthetic ice at least 80% recycled ocean-bound plastic by the end of 2026 to **GROW THE GAME**.

This groundbreaking initiative removes **19–24 tonnes** of ocean-bound plastic per full-size rink to create playgrounds for new hockey fans, while saving up to **300 tonnes of CO₂** and **one million litres of water** every year.

THE SOLUTION.

At **Green Hockey**, we've developed an innovative ecosystem to address those challenges.

Our core technology, **OCEANICE**, transforms ocean-bound plastic into advanced synthetic ice surfaces. Year-round operation with minimal maintenance, energy-efficient, and water-free. Designed for any climate.

SHARKBLADES **patented & game changing** technology seamlessly integrates with synthetic ice, delivering real-ice performance in any environment.

It's about **growing the game** and creating a future where ice hockey is more sustainable, more accessible and more inclusive than ever before.

Nino Niederreiter,
NHL Pro Player Winnipeg Jets

THE

PRODUCTS

<https://green.hockey/>

OCEANICE®

OCEANICE is partly made out of recycled ocean bound plastic for professional performance.

SHARKBLADES®

SHARKBLADES: Swiss Made blade technology delivering 90% authentic ice performance with full skating and stopping capability.

Greenly®

The new puck for synthetic ice use glides on the synthetic surface like a real puck on ice.

Boards

Dual-surface board system: seamlessly transitions between synthetic and real ice.

Black Ghost

Carbon - Steel Dual Blade, 40% lighter. Gives you a strong kick effect in the curves & creates more speed.

Patented swiss/europa made and trademarked.

GREEN.HOCKEY

SHARKBLADES

Hockey anytime, anywhere.

OCEANICE®

*We are cleaning plastics from
the ocean to create new
synthetic ice hockey
playgrounds.*

Through these initiatives, Green Hockey supports the circular economy.

<https://green.hockey/>

OCEANICE®

With **OCEANICE**, we overcame widespread disbelief to produce an eco-friendly ice alternative made from recycled plastic. (Plates 1x2 meters - Groove & Tongue)

It represents a significant advancement in sustainable ice sports infrastructure. Crafted in collaboration with leading environmental partners, our surface repurposes significant amounts of reliably sourced, fair-trade ocean-bound plastic, turning waste into a **high-performance, ISO-certified, non-toxic skating** platform.

Unlike traditional ice rinks, **OCEANICE** requires no water and eliminates the need for energy-hungry cooling systems. The result is a pure, skate-able surface that's ready 365 days a year, regardless of climate or location. From professional training facilities to community rinks, **OCEANICE** adapts to diverse needs **with minimal maintenance**.

NEW

PRODUCT

OCEANICE 2.0 CRYSTAL GREEN

New 3D Puzzle System for easy assembly on smooth surfaces. (80 x 80cm, 15mm thickness)
(31.5 x 31.5 inches, 0.59 inch thickness)

THE MODULARE

OCEANICE® SYSTEM

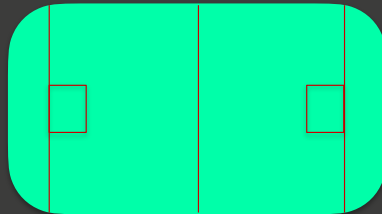

1. S -SIZE Pop-up

Pop-up Business Events 3 on 3 games Ice disco and general ice skating.

Size: 255.6 m² - Net or Plexiglas.

Capacity: 15-20 players.

Setup time: 1 day

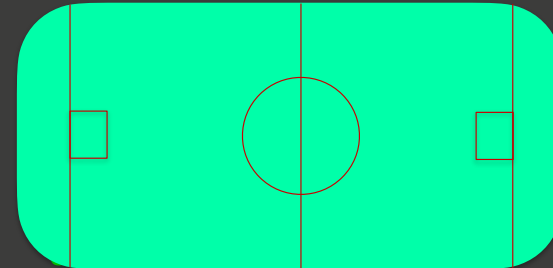

2. M - SIZE

Corresponds to 1/3 of an NHL ice rink. Full trainings and development size. 3 on 3 or 4 on 4 games.

Size: 463.8 m²

Capacity: 25-30 players.

Setup time: 2 days

3. L - SIZE

Corresponds to 2/3 of an NHL ice rink. Full trainings and development size. 5 on 5 games. Official US training size.

Size: 900 m²

Capacity: 40-60 players.

Setup time: 4 days

For a larger surface (XL) - please email quote request to: growthegame@green.hockey

THE

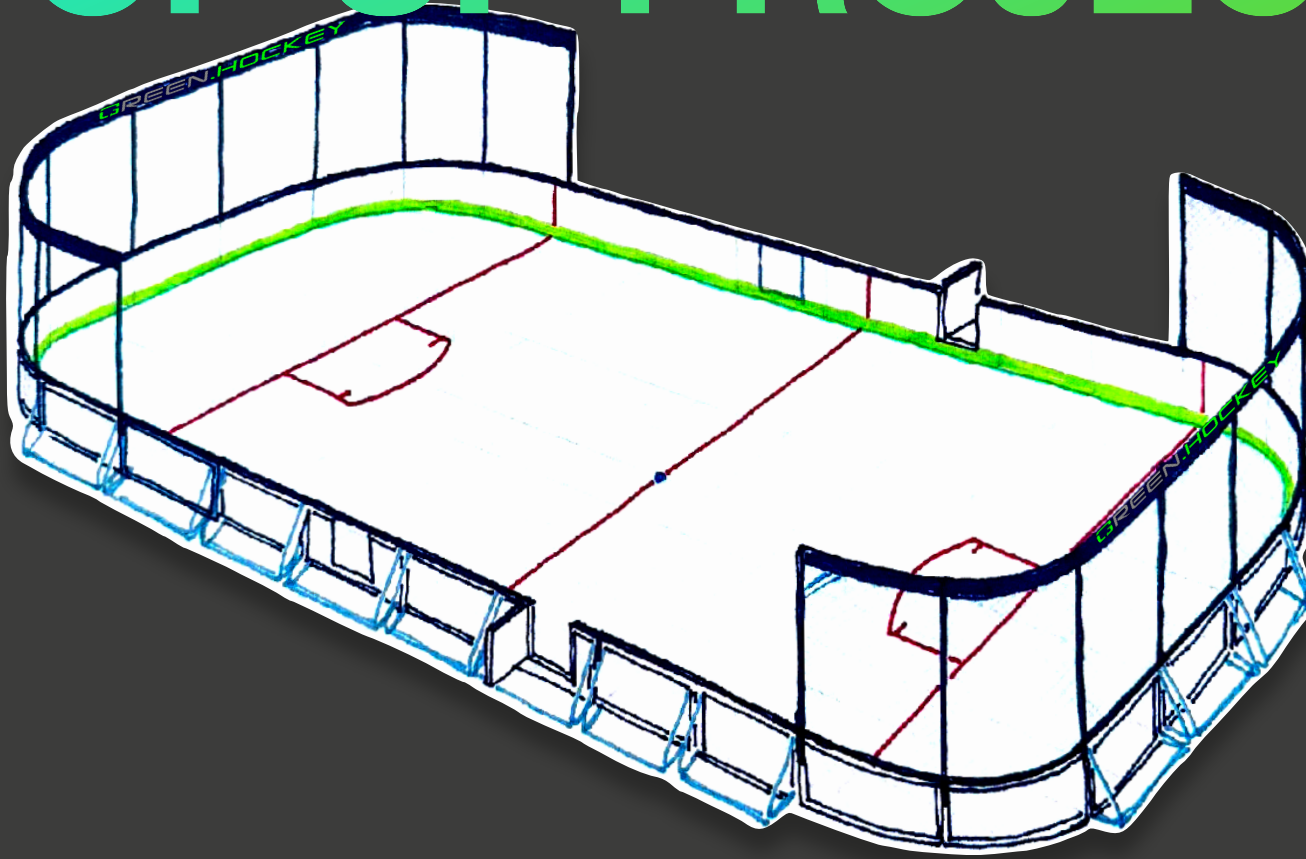

HYBRID BOARDS

Dual-surface board system: seamlessly transitions between synthetic and real ice.

- Winter and summer use
- Specially developed for artificial ice and synthetic ice
- Adaptable system for frozen artificial ice
- Black or white design variant
- Individual orders possible
- Steel and aluminum available
- Net or Plexiglass boards

POP UP PROJECT

Construction with lines for EVENTS - Size: 255.62 m² (21.64 x 11.8 meters)

Confidential Information: This may relate to products, processes or ideas that are under development or planned for development and may become subject of patent applications or other protective rights.

POP UP BOARDS

Swiss Made and Patented.

Player protection (Coated foam) Black, white or green.

Plexiglass or Net

Handrail Color (INSIDE) Black - RAL 9005

Flexible Bands - Steel Color (OUTSIDE) White - RAL 9010 or gray

Kickboard Color: Green, RAL 6024

OCEANICE® ready for SHARKBLADES.

MULTISPORT USE

Up to 6 different sports can be played on one surface.

Tennis/Padel - Sharkblades/Sneakers Soccer

Sneakers Floorball - Sharkblades/Sneakers

Floorball - Sharkblades/Sneakers

Basketball - Sharkblades/Sneakers

Ice Hockey - Sharkblades/Sneakers

Skateboarding - Rubber wheels

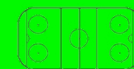

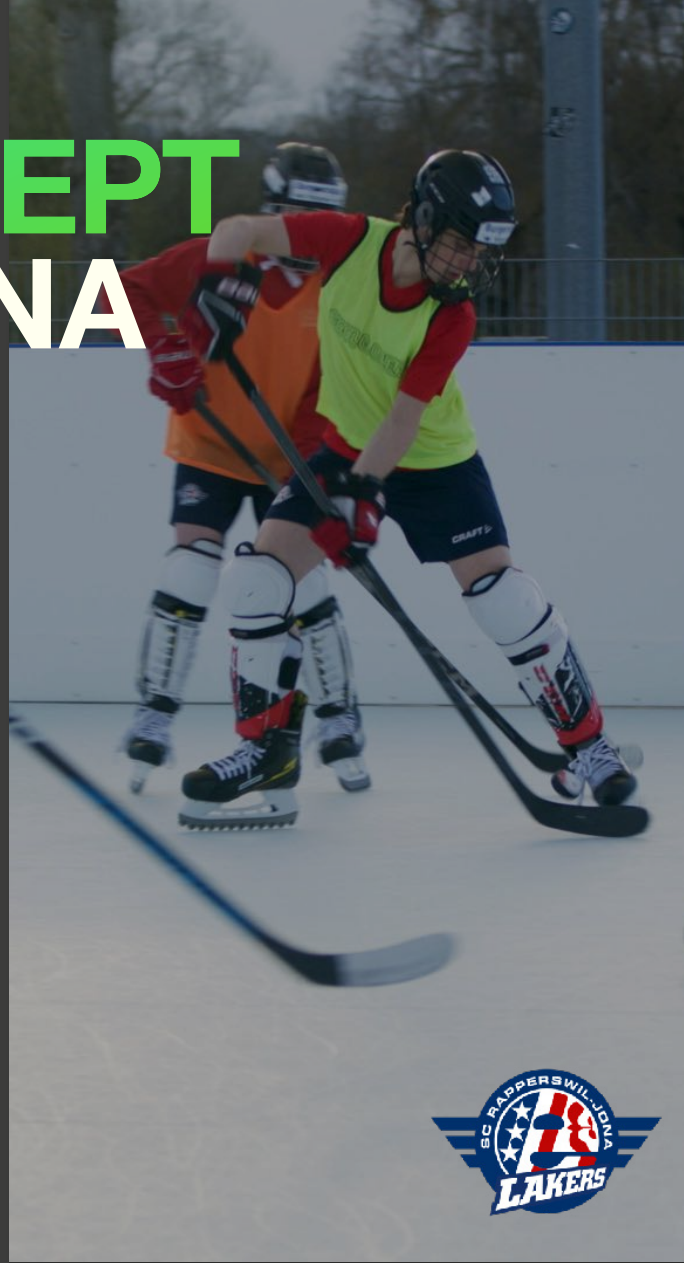

PROOF OF CONCEPT RAPPERSWIL-JONA

In Rapperswil-Jona, we have installed Switzerland's **first & largest synthetic ice rink.**

The **U-17 team in Rapperswil-Jona** is now running regular training sessions on OCEANICE surface twice a week.

This OCEANICE is not just for pro athletes and hockey players: it is open to the **public for recreational** ice skating, offering a unique experience **for skaters of all ages and skill levels.**

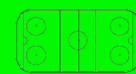

650m²
6,996ft²

PROOF OF MARKET CAMPUS LANGNAU TIGERS

This visionary facility features Switzerland's first **OCEANICE PRO ARENA** -

Combining synthetic OCEANICE and **custom made boards**, tailored to the needs of the SCL Tigers.

This facility marks a significant leap in ice hockey infrastructure, offering unprecedented training opportunities and **pushing the boundaries of player development.**

200m²
2,153ft²

SC BERN

SUMMER TOURNAMENT

Together with Future Now and the largest European ice hockey club, SC Bern, we conducted a first 3 on 3 on synthetic ice this summer. Roman Josi, NHL star of the Nashville Predators, was also on site and supported the youth.

on SHARKBLADES® in Bern - July 2025

SWISS LEGENDS

THE 3 ON 3 GAME

Sunglasses instead of visors. Shorts instead of full gear. On 23 May 2026, at the IIHF World Championship fan zone in Zurich, hockey legends played three on three under pond hockey rules on OCEANICE 2.0 Crystal Green, the first time our new surface was played on. No ice, no cooling, no barrier between the game and the people watching.

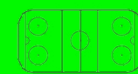

GLOBAL SCALE

THE SHOW BEGINS

First US **OCEANICE®** is accessible to the public. Located at the America First Center, Henderson, Las Vegas

200m²

GREEN.HOCKEY

SHL

SWEDEN TOUR

Together with the Swedish Ice Hockey League SHL, we are organizing a 14-city IMPACT Tour through Sweden. October 2025 - March 2026.

INDIA IS CALLING...

Green Hockey and our partners in India are working closely together to add a new color to the game. We are not importing ice hockey. We are building a new one: a 3 on 3 Green Hockey league on OCEANICE 2.0 Crystal Green, a format that fits the country it is played in. No water, no cooling, made from recycled plastic, ready for the schoolyards and rooftops of a country where more than 600 million people are under 25. First presented at the Times of India SFI in 2026.

NHL

CBM SEATTLE

Together with the National Hockey League, we are working to grow the game and lower the barriers to entry into this sport. At the NHL Club Business Meeting this summer in Seattle, we presented our Swiss Made innovations to all 32 NHL franchises. The journey to a 2nd official playing surface has begun... Let's grow the game together.

NHL

SLAM

SLAM / MIAMI

After a successful Winter Classic event, we have together with the NHL and the Florida Panthers installed an OCEANICE facility on the roof of the MIAMI SLAM school to strengthen ice hockey in southern Miami and make access to this sport easier. The idea is to equip more SLAM schools in the USA with this and infect them with the ice hockey virus...

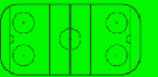

GREEN.HOCKEY

THE FUTURE NET ZERO ARENA

"The first net-zero energy arena worldwide will set a new marker in Switzerland landscape, providing a cost- and energy-efficient sports facility."

Ben Worbs, Investor Green Hockey & Owner SGS
